There's a lot of Digitization in every field especially in these information era of 21st Century. Specially, a museum is the field that can expect a lot of changes and developments through digital age. Digitization can be management of the many different kinds of Museum relics by possessing to databases and maximize efficiency in study of relics, exhibition and education etc.

As tries for digitization, SNU Museum establish a Web home page in the last 2001, and serving through on-line for exhibition rooms and major general relics guidance, all kinds of special exhibition and lecture program guidance etc. And be serving for foreigners as establish an English home page in 2004. From 2003 to 2005, by Assistances of SNU Library, the Museum proceeded a digital contents project, and established contents of important relics at SNUM.

The digital contents of a museum is mostly picture contents achieve, it's unlike other fields. This picture contents are takes diversity used. such as a maintenance of precious cultural assets and a restoration, an exhibition and study.
