Dr. James Quo-ping Lin is currently involved in the development of three large-scale projects, namely, the National Palace Museum Digital Archives, Digital Museum, and Digital Learning at the National Palace Museum in Taipei, Taiwan. Mr. Lin obtained his Master degree in Computer Science and PhD degree in Engineering Management from the University of Missouri-Rolla. He previously worked at the National Tax Administration of Taipei and held managerial positions in various companies in Taiwan. He was an adjunct associate professor in the Department of Information Management at the National Taipei College of Business. He also held the positions of Chairman and Associate Professor in the Department of Information Management at Huafan University. His academic specialty lies in management information system, marketing information system, data analysis and design, as well as e-business. Over the years, he has produced a variety of publication, including books on marketing information system, journal theses and lecture articles. He was also an active member of the Creative Education Consultant Committee under the auspices of the Ministry of Education. In September 2003, Dr. Lin took up the position of Director of the Information Management System Center at the National Palace Museum, guiding the further development of information technology at the museum. Dr. Lin is also the incumbent secretary-general of the Chinese Association of Museums in Taipei, Taiwan and the vice president of the MCN-Taiwan.
