

Shu-Kai Hsieh is an assistant professor in the Graduate Institute of Linguistics at National Taiwan University, Taiwan. He received his PhD in Computational Linguistics from the University of Tuebingen, Germany. He has served on several program committees for linguistics at international conferences, and has given a number of invited talks on computational lexical semantics, corpus and ontology at different universities. He was the conference co-chair for the PACLIC 2009, PACLIC 2010, CLSW 2010, etc, and have been involved in many international collaborative research projects (e.g., EU-granted Framework-7 project, NSC/ANR-granted cooperation project, etc). His primary research interests include lexical semantics and ontology. His publications include two books on Computational treatment of Chinese characters and the Generative Lexicon, and more than 30 refereed research papers published in journals, books, conferences and workshops. He is a member of the editorial board and the linguistic section chair of IJCLCLP, an international journal of Computational Linguistics and Chinese Language Processing. He is a member of a council of Taiwan LSA.
